ONTARIO IS GETTING SERIOUS ABOUT COMMERCIALIZING ITS RESEARCH & DEVELOPMENT INVESTMENTS - Ventus Fund Becomes the First Venture Capital Fund Approved to Participate in Ontario Commercialization Investment Fund (OCIF) Program

Toronto, June 31, 2006 – Ventus Fund Limited Partnership, ‘Ventus Fund’ (www.ventusfund.com) is pleased to announce that its application for Ontario Commercialization Investment Fund (OCIF) registration has been approved by the Ontario Ministry of Finance. Ventus Fund Limited Partnership is effectively the first OCIF registered fund in the province of Ontario with the registration number 40102.

“Ventus Fund bridges the gap between venture capital and technology developments from Ontario universities, colleges and research hospitals. We allow individual investors to participate in quality, true venture capital opportunities previously limited only to institutional investors. Simultaneously, we provide commercialization venues to Ontario research and development community. Our underlying objective is to generate significant and continuous returns for our limited partners, by creating, managing and disposing of equity investments in early-stage, private companies in Canada. We are very proud to cooperate with Celtic House, Northwater Capital and Union Securities as well as the leading Ontario universities and research institutions“ reports Andrey J. Szpynda, Ventus Fund general partner.

Ventus Fund opportunity is defined by some very unique features:

- Limited Partners can participate directly in select opportunities
- No management fee
- Funds not invested are fully refunded to the Limited Partners

Ventus Fund is still accepting institutional and accredited individual investors to participate in this unique investment opportunity.
